

Jarrow Prepares to Hold Sports to Beat All Efforts

Jarrow's annual big day will be held this year on Wednesday, June 3. Large posters, printed at this office, are now telling the world about the time you can look forward to on this occasion. The sports are being sponsored by the Jarrow Board of Trade, and among the many events scheduled is a bucking horse contest and riders are invited to bring their best buckers and take away the prize money. There will be horse races and pony races with an attractive line of prize money. Athletic events include children's races, potato race, an exhibition by the Coal Spring Athletic Association, a slow car race for 4-cylinder cars only, vintage 28 or older; a baseball game at 6 p.m., and a softball game between two old rival teams. A dance at night with Coulman's orchestra furnishing the pep will wind up the festivities. The committee is endeavoring to secure the services of a prominent speaker for the afternoon. The Jarrow ladies aid will have charge of the booth on the grounds. For any information, write Allan Harper, secretary-treasurer, Jarrow, Alberta. Everybody invited.

BY THE WAY

If at all possible, vegetables should be cooked in their skins in order to avoid removing the valuable mineral matter directly under the skins.

Sugar, used wisely, is an important source of energy to the body. Plain white sugar is used best with cereals and in the preparation of milk, eggs and fruit desserts. Used thus, it makes more palatable and delicious the foods that have greater importance for body building, while also adding to their energy value.

Soft butter or lard should never be used in making pie crust. Whatever shortening is used should be hard and very cold.

Before placing sponge cake in the oven to bake, try sprinkling a little fine white sugar over the top. This forms the rich, brown-looking crust that makes sponge cake you buy look so tempting.

Piquant dressing can be served on sliced tomatoes or lettuce salads. To make this dressing, add one hard-boiled egg, two tablespoons chopped green pepper, two tablespoons onion and three tablespoons catsup to two-thirds cup French dressing.

Cut lettuce leaves to be used in sandwiches with a pair of scissors. Trim off all edges that project beyond edge of sandwich.

To tell when a cake is done: It shrinks from the pan, it springs back when pressed lightly with the fingers, it leaves a clean, non-sticky tester to stay.

After strawberries are sealed in a jar, lay it flat until cool, then shake until the berries are all through the syrup. They will neither rise nor settle and their flavor will be greatly improved.

While an evangelist was holding services in Riley last summer he approached a young man in the church and inquired: "Are you a Christian?" "Oh, no, sir," replied the young man, "I am only one of the choir."

Wedding Unites Two Happy Young People Saturday

(From the Viking News)

LEE — CLARK

A pretty wedding took place at the home of Mr. and Mrs. Wm. Gardner east of town, on Saturday, May 23rd, at 2:30 p.m., when Miss Buelah Myrleen Clark was united in marriage to Mr. Wm. Edward Phillip Lee, son of Mr. and Mrs. W. J. Lee. The nuptial ceremony was performed by Rev. Dr. S. Scott, pastor of the Viking United Church, in the presence of immediate relatives and friends of the contracting parties. The bride was given in marriage by Mr. Bruce Barber. The bride was attended by Miss Mary Jensen, while Mr. Leslie Vincent Lee acted as best man. The bride looked charming in a gown of white net trimmed with moire, and carried a bouquet of red and white roses. The bridesmaid wore flowered silk georgette and carried a bouquet of red and white carnations.

After the happy ceremony the guests sat down to a sumptuous wedding dinner. The wedding cake was most elegantly decorated by Mr. Leaser, who is a pastmaster at the art.

The guests included Mr. and Mrs. Dwight Draper; Mrs. K. Edgar, Miss Freda Miller, and Dr. Greenleaf, of Edmonton; Mr. and Mrs. Wm. Gardner; Dr. Scott and Ellen; Mr. and Mrs. W. J. Korns, Kinsella; Mr. and Mrs. J. A. Waite, Jarrow; Mrs. Willerton, of Irma; Miss O. Holmberg; Miss Annie Jensen; Mr. and Mrs. G. P. Lee, and Mrs. Bruce Barber, George, Arthur and Amy; Mr. and Mrs. W. J. Lee and Evelyn; Mr. and Mrs. W. Barber, Irma; Mr. and Mrs. W. J. Fleming, of Holden.

The newlyweds left by car midist a shower of rice and good wishes for Edmonton, where they will take up residence in the Shasta Apartments. Both young people have a host of friends who join in wishing them every happiness.

On Friday, May 15th, a social evening was held at Quinte school, sponsored by the Ladies' Auxiliary and the Quinte Crescent Club, in honor of Miss Merle Clark, a bride-elect of this month. After a concert, Miss Emma Hurray presented Miss Clark with a gift from the Auxiliary and the Club, after which a barrel was brought in filled with miscellaneous gifts from members of the community. A lovely lunch was served and dancing enjoyed till 3 a.m. Miss Clark is held in high esteem here, she having been secretary of both the auxiliary and the club. She is being married on May 23rd to Mr. P. Lee, of Edmonton, where they will reside.

MODERN LULLABY

Rock-a-bye, why do you fret;
Are you aware of the national debt?

Father has gone round the corner to vote
Millions in bonds for his snookums to tote.

Are you suspicious? Sleep while you can.
You can squirm later, dear, when you're a man.

She: "Here's one: What does Mae West buy vaseline for?"

He: "Won't guess."

She: "Ten cents."

SEEDING OPERATIONS ARE NEARING COMPLETION THROUGHOUT PROVINCE

May 22, 1936. — In the southern districts and north to Red Deer, seeding has continued with little interruption during the past two weeks. In this area wheat seeding is completed in the more southerly sections, and only a small percentage remains to be completed east and north of Calgary, while seeding of coarse grains is well advanced, especially from Calgary south.

From Lacombe north to Athabasca, intermittent rains and comparatively low temperatures have continued to retard progress, these conditions being more acute in the northern portions of this area where only the lighter soils and well drained fields have been seeded. In this zone an appreciable reduction in the intended wheat acreage seems inevitable because of the abnormally late season. Warm weather is needed in this area to promote more favorable crop conditions.

Rapid progress in spring work has continued in the east central district

north to Vermilion, wheat seeding being almost completed and seeding of coarse grains general.

In the Peace River district, fine weather with occasional light showers has prevailed south of the river where spring work has made normal progress and all seeding is well advanced. North of the river work on the land was impeded by heavier rains until early in the present week, though considerable progress has been made during the last few days with the major percentage of wheat seeding completed.

Heavy rains on May 20th were more or less general from the Edmonton zone south to the boundary. Although this only added to the excess moisture in the north, it was most opportune in the more southerly districts where a deficiency of surface moisture was beginning to be felt.

A precipitation of 1.04 inches is reported from Lethbridge for last Wednesday's rain.

The Misses Marion and Edith Watson spent the week-end at their home north-east of town.

Mr. and Mrs. Bob Arkenstall and sons and Miss Bell Arkenstall of Edmonton spent the holiday at the home of their parents, Mr. and Mrs. C. F. Arkenstall.

Freeman Greenwood left Monday for Ontario, where he expects to reside.

The Misses Lucille and Laura Mark spent the week-end at the Half Ranch.

Miss George Lee spent the week-end at her home in town.

Mr. and Mrs. E. C. Williams and daughters, Miss Dorothy and Violet, went to Cozonation on Sunday, returning Monday.

Mr. and Mrs. J. Neale and family spent the holidays at Vermilion.

Mr. Bishop, who has been visiting his daughter, Mr. J. Neale and family, the last two weeks, returned to his home in Vermilion on Sunday.

Mrs. Crouse went to the city on Saturday to have some more treatments from her doctor. Mrs. Crouse is slowly regaining her health.

L. Cameron visited his home south of Sedgewick over the week-end.

Mr. and Mrs. W. L. Ferries were Wainwright visitors on Sunday.

Those attending Loughed sports Monday from here were: Mr. and Mrs. Nease, Miss D. Fleming, Miss Vimy Murray, Mr. Stanton, Mr. Wilton and sons.

Mr. and Mrs. Nease and family were guests at the Revell home Sunday.

Miss Jean Bowden was a guest of Mrs. Ferries the first of the week.

Miss Margaret Scott came home Monday, after several weeks at the University hospital. We understand Miss Scott is much better, and expects to return to her school soon.

The Misses Patricia and Francis Stronach went to Edmonton last Saturday to visit their father at the University hospital. Francis returned Tuesday and Patricia will return this last of the week. Mr. Stronach is reported as being slightly improved.

Services for next Sunday, May 31: Paschendale 11 a.m., Crescent Hill 3 p.m., and Irma at 8 p.m.

The Women's Institute

The next meeting of the W. I. will be held at the home of Mrs. F. Thurston on Thursday, June 4th, at 2:30 p.m. The roll call will be answered by your favorite salad, exchange of recipes. Hostesses: Mrs. W. Barber and Mrs. W. Stewart.

CARD OF THANKS

We wish to express our thanks to the members of the Masonic Lodge for planting our garden and to all those who visited us during our recent illness.

—Mr. and Mrs. J. H. Elliott and Mary.

She frowned on him and called him Mr. Because in fun he merely Kr. That very night, Just out of spite, The naughty Mr. Kr. Sr.

Barn, Horses, and Harness Destroyed By Fire; Big Loss

Norman Bignold, farming on the old Lewis place north of Fabyan, met with a serious loss last week, Tuesday. Several days previous he had been burning an old straw stack, the bottom of which continued to smolder as frequently occurs in such cases. Sparks from this were carried by Tuesday's high wind to the barn which ignited and burned to the ground, together with six work horses, harness and a valuable saddle. Norman estimates his loss at \$500, aside from the building which belongs to a Wainwright syndicate along with the land. Kind neighbors donated labor to help him finish his seeding, several of them working with their teams two days.

POULTRY RETURNS MAY BE BOOSTED

Weekly News Letter From Dominion Experimental Station, Lacombe.

The price of eggs has been discussed from a great many angles, but here is a graphic illustration of yet another point of view, and the fallacy behind it.

A farmer has a flock of fifty hens. In the winter they produce four dozen eggs a week, which are sold at 30c a dozen. In the summer these same hens produce twelve dozen eggs weekly, which are marketed at 10c a dozen. In other words, from the same hens and similar feeds, equal returns—\$1.20 a week—are secured summer and winter; and the argument has been advanced that he should be satisfied with this.

That is not the opinion of the Dominion Experimental Station, Lacombe. The Lacombe Station has pointed out the fallacy in this illustration—that if this flock can produce twelve dozen eggs weekly in the summer (and this is only 41% production) they can do just as well in the winter. The hens have to be fed a certain amount to maintain their body weight and produce four dozen eggs weekly in winter, and very little extra care is required to make them produce twelve dozen eggs weekly at the time egg prices are at their peak—so that, instead of having an egg income of only \$1.20 weekly in the winter the farmer receives \$3.60 weekly, or three times as much.

At the Lacombe Station, most of the chicks are hatched in April, so that the pullets come into production in October. In September the flock is thoroughly culled, and all potential boarders "get it in the neck." The flock comes into full production at the time of the highest egg prices, so that the greatest possible returns are secured for the feed consumed by the birds.

Feeding plays a very important part. A little of a correct mixture of feeds is worth a great deal more than a lot of poor mixture, and very little extra care is necessary in order to reap the benefits of the triple returns at a time when labour is cheap and plentiful, and when the extra cash can be readily used.

The proper feeding of poultry at all stages of development is discussed in the bulletin "Brooding and Rearing of Chicks" and "Poultry Feeds and Feeding," which will be forwarded by the Publicity and Extension Branch, Department of Agriculture, Ottawa, on request.

Nephew Baby Dies From Burns When Home Is Destroyed

The eight months old baby daughter of Mr. and Mrs. Joe Nephew is dead as a result of burns, and the residence totally ruined when fire destroyed the home in which they resided, fifteen miles north-east of Irma, late Wednesday evening. The farm property is owned by Mr. W. H. Osterhout.

Mr. Nephew was away at the time of the fire, but others were doing chores about the place when smoke was seen issuing from the house. They broke the window in the room where the baby was sleeping as the flames were devouring the building. The young child was rushed to Irma where Dr. Greenberg at once took the tiny victim to the Wainwright hospital where death occurred at about 9 p.m., an hour after arrival at the hospital.

Residing at the same place were Mr. and Mrs. Howard Jones, grandparents of the young child. The cause of fire is unknown at time of going to press. The parents are grief stricken at the sudden and untimely death of their young daughter.

Facing a Big Deficit

The discovery that the operations of the Federal government for the fiscal year ending March 31, 1936, resulted in a deficit of approximately \$162,000,000, as announced by Hon. Chas. A. Dunning in the recent budget speech in the House of Commons must have come as a considerable shock to a large percentage of the Canadian people who must pay the piper.

The shock is not assuaged at all by the additional announcement that the increase in the sales tax from six to eight per cent, which the government decided to levy will not be a heavy enough impost to enable the government to balance the budget for the current fiscal year and that, on the other hand, the best that can be expected from this and other minor levies is a deficit of something less than \$100,000,000 for this year.

Not much is to be gained by any attempt to lay the blame for this enormous deficit at the door of any particular administration. Doubtless politicians within the fold of the two major political parties will rise up and assert that the other party is at fault, in the one case the former regime and in the other the present administration, while adherents of other parties, who have not yet been given an opportunity to demonstrate their ability to govern the country, will declare that the economic system is to be blamed.

The fact remains that there is a shortage of \$162,000,000 as the difference between governmental income and outgo which has to be made up by approximately 10,000,000 people and the same number of people are apparently likely to have to make up another \$100,000,000 or a little less next year. The money must come out of the pockets of these ten million Canadians and apparently the only way to get it is by increasing taxation in some form or another.

The government has decided that the loss is to be made up partially by an additional levy of two per cent, in the form of sales tax, which means by the extraction of another two cents on every dollar spent by the consumers on practically "everything manufactured and produced in Canada." Hon. Mr. Dunning stated that by this means the government is placing the burden on "rich and poor alike." Whether it will work out that way in actual practice, it is almost impossible to say at this stage, whatever the intention may be.

It is axiomatic that in the final analysis the consumer must and does foot the country's tax bill, and it is a matter of history, that sometimes business not only collects the tax from the consumer but a little bit more by adding a small profit on the tax as well as on the cost of the goods and the cost of their distribution. In this way a tax sometimes becomes pyramided by the time the goods on which they are levied reach the consumer. The present system of collection makes this kind of thing possible and it is to be hoped that the government will take such measures as are necessary to see that the consumer is not forced to pay an additional tribute to retailers, jobbers, wholesalers and manufacturers, or any of them as a result of the increase in the sales tax.

For any government, of course, a sales tax or an increase in sales tax, is one of the easiest ways of securing revenue from its subjects. Within a couple of months people will have forgotten about the budget and that they are paying another two per cent. towards governmental administration on practically everything they buy, because it is a hidden impost.

In this connection there would seem to be more merit in the sales tax system in vogue in the State of Oklahoma where the tax is collected by the retailer and where the retailer is required to show on his bill to the customer the price of the article and the amount collected in tax as a separate item.

This system, while unquestionably tedious and cumbersome to the retailer, at least has the advantage of making the consumer "tax conscious" in the same way as has a direct income tax. Every time he makes a purchase from a nickel upward he is made to realize that he is making a contribution to the government and the amount he is contributing. If this system were in effect throughout Canada, no doubt it would result in greater pressure being brought to bear on the government to economize and might act as a deterrent in the number of requests made to the government for expenditures which might be avoided.

There are, on the other hand, some very potent arguments against the adoption of such a system of tax levy and collection. It would often result, no doubt, in efforts on the part of consumers to induce the retailers to absorb the tax and where competition is keen might result in injustice to the merchants. In addition to which, the time that this method of billing and collection would require, would no doubt, entail extra cost to the merchant which, under present conditions, he could ill afford.

Sounds Like Good Idea

Children In England Learning Problems Of British Railways

"Great Britain is the only country which trains its children in modern transportation," says T. R. Deister, of the Associated British Railways, in discussing a nation-wide educational program for children recently started.

"Not satisfied with mere rapid mechanical development, the heads of British railways have realized that, in the long run, the position of their roads depends directly upon public understanding of rail transport problems. Realizing that transport is for the ages and not merely for the adults of to-day, they have begun to teach the children the fundamental facts of railroading, and are conducting a series of nation-wide demonstrations for school children. Over 40,000 children have attended these. Instruction in every branch of railroading, from locomotive driving to signal systems, is given to children by competent instructors, on special demonstration cars which are routed throughout the country.

"The eventual result, it is believed, will be a sympathetic understanding by the whole people of the Empire's railroad problems."

Glass dating back to 1400 B.C. has been found in ancient, Egyptian tombs.

HOW'S YOUR BLOOD?

Weak follow the advice of Dr. J. E. M. Macgregor, who said: "My daughter, who was in a badly run-down condition when she was six years old, she was quite thin, had no appetite and had a nervous system, caused by faulty elimination. Dr. J. E. M. Macgregor's Golden Medical Discovery built her up so that she ate better, gained weight and the pimples cleared up." See now. New size, tablets 50 cts., liquid \$1.00 and \$1.35.

Temple To The Sun

Building In England To Have 7,500 Feet Of Gardens

A temple to the sun with 7,500 square feet of hanging gardens is rising in England in the midst of one of South Hackney's most populous districts.

It is an experiment by the Bethnal Green and East London Housing Association in which housing experts, builders and architects have worked together to evolve the "sun and air home" of the future.

"We were faced with the problem of making the flats as much like houses as possible," said the architect, J. E. M. Macgregor, "and so we provided each flat with its own private garden on the same level."

The first section of the "sun temple", containing 16 flats, each with a minimum of 200 square feet of hanging garden open to the sky, will be completed in the near future. Even on a dark day the building, with its yellow brick walls and red tile roof, suggests sunshine.

To make the gardens possible a new kind of building of pyramid shape was devised, the flats being built in receding steps around a covered hall. This hall will be let as a market.

It is one of the first buildings in the world to be built on the cantilever system.

Received An Answer

"Good gracious!" shouted the schoolmaster. "I ask you the simple question, 'what is a fortification?' and get no answer!"

The scholars stared, but no one answered. The master tried again. Pointing to the boy at the bottom of the class, he demanded—"Tell me, what is a fortification?" "Two twentyfifths, sir," came the answer.

The local church of Hampton Wick, England, serves boiled eggs, butter, rolls, marmalade, and tea free to all who attend Sunday morning services. The vicar originated the idea and foots the bill. 2150

Iron the Easy Way
WITH THE Coleman
HEAT-SETTING
IRON

Why You Should Have It

1. Costs only 1/2¢ on ironing
2. Lights instantly
3. Heats in a few seconds
4. Quickly ready for use
5. Maintains even heat
6. Hotter at the point of ironing
7. Irons with less effort
8. Saves 1/2¢ ironing time
9. No fire to build up
10. No ashes to carry

Priced as Low as \$5.95!
New you can iron in ever-widening range of shades from white to dark. The Coleman iron is self-heating. No cord required. No gas. No electricity. A small, compact, portable iron, made available at New Low Prices. Ask your dealer or write for free literature and details. The Coleman Iron and Sewing Co., Ltd., New York, U.S.A.

Reduction In Insurance Rates

Hudson Bay Route Season Has Also Been Extended

Marine insurance rates on the Hudson Bay route have been reduced for the coming year and the season extended eight days, Railway Minister Howe announced in the House of Commons.

The season this year will last from Aug. 5 to Oct. 10 before surcharges are added to marine insurance. The season last year was from Aug. 10 to Oct. 7.

The earlier date of opening is qualified by the provision that no ship must pass Cape Chidley, inbound to Churchill, until the government ice breaker, the N. B. McLean, gives the word. Cape Chidley is at the eastern end of the strait.

The reduction in insurance rates applies only to hulls and machinery and does not apply to cargo. It is a premium charged by marine underwriters over and above the year-round insurance carried by vessels. The year round rate covers them against accident on all trade routes of the world except a selected few. Before a vessel may enter these special trade routes, a premium has to be paid. The Hudson Bay route is one of these routes and the premium to be paid has now been reduced to 25 per cent.

The reduction of insurance rates amounts to 25 per cent. A vessel of 5,000 tons, valued at \$250,000, equipped with Gyro compass, will pay \$625 per round trip. The same boat in 1933 paid \$1,500; 1934, \$1,250; 1935, 1937. If not equipped with Gyro compass, the boat would have paid \$1,750 in 1933; \$1,500 in 1934; \$1,125 in 1935 and \$843 in 1936. Reductions resulted from representations to the Imperial Shipping Commission in London.

Sound Financial Policies

Secret Of Britain's Success Opinion Of Former High Commissioner

Sound financial policies adopted three years ago are responsible for Great Britain's "muddling through" recent trade crises to world leadership in the opinion of C. Howard Ferguson, recent Canadian High Commissioner to London and former Premier of Ontario.

Mr. Ferguson, who arrived at San Francisco on the last lap of a world cruise which took him to all parts of the British Empire, declared the activity of the Mother Country was reflected in all parts of the Empire. "There are no other countries in the world where business is as good. Great Britain leads, and Canada and South Africa run her a close second," he said.

One of the reasons for farm failures in Canada, Mr. Ferguson believes, was the cultivation of too much ground. His 35-acre farm near Ottawa had paid him a net profit of \$1000 per year for the past 20 years.

A Knight Of St. George

Duke Of Kent Is Now Member Of The Order

Although St. George's Day received no general commemoration in London, special significance attached to the annual service of the Order of St. Michael and St. George held at St. Paul's Cathedral.

The Duke of Kent, appointed a Knight of the Grand Cross last year, wore for the first time the rich mantle of Saxon blue with the elaborate collar and chain over his naval uniform. The procession to the high altar consisted of other high officers as richly apparelled.

In the chapel of the order, which is part of the cathedral, the Duke of Kent's banner was ceremoniously hung; and the banners of those knights who had died during the year were taken down.

"That Iceland may serve as an air base for trans-Atlantic planes flying between Europe and America is foreseen by Iceland's minister of education."

Must Lower Trade Barriers

Revival Of World Trade Necessary To Halt Economic Distress

Declaring there is a "rising danger" of a catastrophic world war, U.S. Secretary Hull at Washington, attacked what he termed the "supreme folly" of "excessive" trade barriers.

A revival of world trade through a lowering of such barriers is necessary to halt the "virulent distress" of economic distress, social unrest, dictatorships and war, Hull declared in a speech prepared for delivery to the closing session of the chamber of commerce of the United States.

"Only as the world's economic health is restored will individuals and nations develop again adequate resistance to the psychological madness that makes possible internal and external strife," the secretary of state said.

Describing the new reciprocal trade policy, Hull said that if it were scrapped, the United States would take a "fatal" step backward.

SELECTED RECIPES

ICE BOX NEAPOLITAN COOKIES

- 1/2 cup butter
- 1/2 cup white sugar
- 1 egg yolk
- 3 tablespoons milk
- 1 1/2 cups Purity Flour
- 1 teaspoon baking powder
- 1/2 teaspoon salt
- 1 ounce grated chocolate

Vegetable coloring
Method: 1. Cream butter and add sugar gradually. 2. Add unbeaten egg yolk and beat mixture well. 3. Add milk, and flour sifted with baking powder and salt. 4. Divide mixture into three parts. 5. Roll out one part on slightly floured board. 6. To the second part add chocolate, melted; roll this out on top of first rolled part. 7. To the third part add a few drops of pink, green or any other vegetable coloring and roll it out on the chocolate part; roll all three together as you would a jelly roll. 8. Place in ice box overnight. 9. Slice thinly and bake in moderate oven of 350 degrees for 10 minutes. (Two parts may be used instead of three, if desired.)

Weather Expert Retires

F. Napier Denison Relinquishes Post At Victoria

F. Napier Denison, who studied the earth's phenomena from Gonzales Hill observatory for 48 years, has retired from his post as superintendent of the Dominion government meteorological bureau at Victoria.

As he left his office in the dome-shaped Gonzales observatory, relinquishing his position of close to half a century to W. A. Thorn of Toronto, Mr. Denison said he was not through with scientific research.

During the years he has been in the government's meteorological service, Mr. Denison has been interested chiefly in tracing the world's earth tremors. He is known well across the Dominion and on the Pacific coast as an expert weather observer.

Another Great Ship Scrapped

French Liner Once As Famous As New Queen Mary

Less than 24 hours after the Queen Mary had made her triumphant passage down the Clyde another great ship was dragged ignominiously up the channel, stern first, to end her days in the shipbreakers' yard. She was the 42,000-ton liner l'Atlantique which was once to the French just what the Queen Mary is to the British people to-day, and which was burned in the English Channel several years ago. Over 100 men will be engaged for about a year on breaking her up.

The tusks of elephants are regular teeth and are not shed.

A judge recently told a woman to speak just as if she were at home. The case is still proceeding.

It's a Hit!

A joy-drive—right where it counts in smoking pleasure! Yes, sir—that's what Ogden's Fine Cut gives you every time it steps up to a light. Satisfying! Man, a homer in the ninth with the bases full has nothing on Ogden's Fine Cut. And now that times are better, Ogden's with "Chantecler" or "Vogue" papers, is the team to bank on for full enjoyment in rolling-your-own. The purple easy-opening ribbon on each package is mighty handy for removing the cellophane wrapper.

OGDEN'S FINE CUT

P.S.—Your Pipe knows Ogden's Cut Plug.

Divided By Chalk Line

Brothers Lived In Room-Like Hermits For 62 Years

Death has separated two brothers, whose hermit-like existence in the hills in New York State had been divided by a chalk-line for 62 years. George Washington Coleman, 78, said he would "carry on" in the little cabin of Bakers Gulch where James Philatus Coleman, 81, died of pneumonia.

For more than half a century the two brothers had lived in the little cabin as veritable strangers, a chalk-line through the centre of their one-room marking the boundary of their individual domains.

Long School Vacations

School vacations in Spain are the longest in Europe, namely 122 days; those of Holland, Germany, Denmark and Italy the shortest; the Dutch pupils having from 43 to 51 days, the German from 31 to 45 days, the Danish and Italian, 45 days.

There are taste buds up and down the barbels, or "whiskers," of a catfish and similar buds over the larger part of its body and this fish can taste foods brought in contact with it on all sides, at once.

A judge recently told a woman to speak just as if she were at home. The case is still proceeding.

Uniforms For Air Force

Are Shown In Issue Of Canadian Airway Bulletin

Foretaste of what is to come when the Canadian air mail is resumed in 1937, as current plans call for, is given in the latest issue of "The Bulletin," published by Canadian Airways, Ltd.

It shows a photograph of two officers of the company dressed in the natty blue uniforms of Canadian Airways, complete to peaked caps, with the familiar Canada Goose emblem of the company. These uniforms, it is explained, will be worn by all pilots and co-pilots on all main routes. The first of these are worn by pilots on the Vancouver-Seattle service. The planes there have also just been fitted with complete two-way radio equipment.

Will Add To Collection

King Edward will continue and add to the famous collection of British empire stamps left by the late king, E. Goodfellow, noted British philatelist, said on his arrival at Montreal from England. He was en route to New York to judge the philatelic exhibition which was held in Grand Central Palace.

Manitoba's honey production in 1935 exceeded five million pounds. There were more than 3,300 apiarists with 51,416 hives of bees.

FLEMING'S FOLLY

—BY—
LAWRENCE A. KEATINGE

SYNOPSIS

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation company.

The meeting terminates, but Buzz Hamilton and his sister, Helen, Link and Kilgo stay behind and Helen asks Fleming questions about his irrigation plan. This angers Buzz, who accuses Fleming of trying to influence his sister and, as he asserts, ruin his "spread". Buzz shoots at Fleming in an uncontrollable fit of anger but Buster Townsend, Link's foreman, is shot in the stomach, and Fleming is uninjured. Buzz is arrested and sentenced to three years' imprisonment.

Helen and Fleming form a partnership to provide irrigation for their own properties.

Fleming goes home and studies the plan drawn by Torrey to learn whether they could be adapted to a smaller scheme suitable for his and Helen's land, and is satisfied it could be done. Feeling cold, he lights the fire and there is an explosion that wrecks the house, burns it and the plans and renders Link unconscious. He is rescued from the blaze by an employee.

Buzz Hamilton arrives back in Rawhide while Fleming and Helen are in the bank getting a loan for payment of wages for work on the dam. Roper Kilgo and Jackpot Mell meet him and he goes into the saloon with them. By the time his sister and Link come from the bank, Buzz has had several drinks. Roper has distorted the facts concerning the dam proposal to Buzz, making it appear that Link was trying to ruin him. Buzz, inflamed with liquor and anger, tries to throttle Fleming, but is thrown to the floor. Then Helen appears and tells Fleming she has been robbed of the \$500 they had obtained from the bank.

On their arrival home they were met by a couple of Link's workmen, who told Fleming that there was a strike at the dam, and that the men were afraid they would not get their wages. Link told them of the robbery and promised them their money as soon as possible. The men reluctantly returned to work.

Fleming finds Roper and Jackpot Mell making trouble among his workmen, and orders them off his place at the point of his gun. Both Jackpot and Roper swear revenge, Mell telling Fleming to carry his gun with him, as Mell would shoot him the next time they met.

(Now Go On With The Story)

CHAPTER XIV.—Continued

The wiry little Irishman he addressed was pale with pain. But with the buoyancy of his race he grinned wryly. "Feel like one o' them Egyption mummies, Mither Fleming! Only I guess they ain't got busted legs like I have, eh?"

Link examined the man's injuries and found that he had the arm broken three inches below the elbow, feet and legs crushed by dirt and pebbles, and a bad bruise in his side. He was not dangerously injured, however, unless internally, which could not yet be determined.

When he made sure of arrangements going forward to take the pair by wagon to his own ranch, Link for the first time noticed that the remaining workers stood around in an attitude of surly indecision. "Well, boys?"

One, bolder than the rest, stepped forward. "We don't like the way things are goin' around here," he growled. "We want our pay. We're quittin' now."

For an instant Link did not know what reply to make. Several laborers supported this with similar statements, and the remainder of the group a dozen strong, looked belligerent.

Fleming glanced toward the scene of the accident—it could possibly be an accident, which he strongly doubted. "I see," he said slowly. "You're all yellow. Scared to work here, just because a couple of men got hurt by something that couldn't be foreseen."

"Boys, I told McLendon to take every precaution for safety. Buster Townsend got the same instructions. Hey, Mac, isn't that so?" He saw the engineer coming toward him after personally seeing that Orless and Jimmie Dooley were started toward the Star Loop.

"I think I've done everything a man could," he said briefly, and hurled a withering look at the quitters.

"Well, they're yellow, Mac. They want their dolls. They're going home."

"Now, that ain't it, Fleming. We ain't scared. But—"

"But what, Ferguson? If you have anything to say, say it!" The self-appointed leader shifted uneasily, pointing one of his fellows would speak up. But none did. "It's pay, mainly. And we been workin' long enough. We're quittin'. We want our money."

Fleming regarded him quizzically. "You want your wages to take home now, is that it? You're not out to earn all you can for that wife of yours, eh? Satisfied to earn a little while she takes in washing."

Do You Ever Wonder

Whether the "Pain" Remedy You Use is SAFE?

Ask Your Doctor and Find Out

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE to use regularly is your family doctor. Ask him particularly about "ASPIRIN."

He will tell you that before the discovery of "Aspirin" most "pain" remedies were advised against by physicians as bad for the stomach and, often, for the heart. Which is food for thought if you seek quick, safe relief.

Scientists rate "Aspirin" among the fastest methods yet discovered for the relief of headaches and the pains of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In your own interest remember this:

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

She's worth four of you, Ferguson, and I say it was unlucky she ever met you. You're lazy, no account; don't deserve an honest, pretty woman like you got. You never gave her a square deal yet, and if Mac hadn't stopped all liquor over here you'd be drunk same as you are at Rawhide now—half the time!"

He spat disgustedly. "Your type is a quitter anyhow. You're no good to anybody, especially your wife and yourself. All right, you don't quit here. You're fired!"

The charges Link made were true, as every man listening knew full well. Yet it would not have mattered had not his anger been aroused had he not needed a bold stroke. He knew at a glance that Ferguson was the chief trouble-maker here, and perhaps was responsible for this sudden strike. Link advanced on the man. "Get out before I knock you down!"

The fellow retreated to safety. "I want my wages!" he whined.

Fleming plunged a hand into his trousers pocket and drew out several bills. "How much, Mac?"

"Twelve dollars an' forty cents," supplied Ferguson.

"All right. Never mind lookin' it up. Here," and Link tossed over the change. "I'm glad to get rid of you so cheap. Now clear off this property before I knock you off!" he snapped.

But now he had received his money, Ferguson seemed reluctant to leave. He halted a safe distance and turned. "Say, Mr. Fleming—" "Get out! And don't come back! Now, boys, what's the trouble? Worried I'm not going to pay up? Or are you a gang of good-for-nothings like Ferguson, so when you have a few dollars coming you want to scoot to town and guzzle it down in whiskey?"

Stated this way, they were uncertain. "Wal," said a red-nosed man, staring down at his broken and dented finger nails, "I don't mind workin' another day or two for yuh. Link. That is, if I'm gonna get cash when it's over."

"Saw what I gave Ferguson?"

"Yeah."

"There'll be more where that came from. I've kept my steers free just to take care of you hombres, and I'm sellin' 'em tomorrow. That means cash at least before sunset. Ought to satisfy the crowd of you."

"But say," objected a grizzled individual, who wore the habiliments of a miner, "we need twice as many guys workin' here!"

There was some truth in this. Fleming frowned and angled his chin, glancing at McLendon. He could not think where it might be possible to get more men with the whole of Boone County hostile to his project. "Boys, we're nearly to the end of this job. I'll pay double overtime, so there's a good chance for you to make some real money!"

"And cash when?" persisted another individual. "Double time's no good until we get it!"

"You'll get it. Cash up to date tomorrow. I don't mean the next day nor next week. Tomorrow! That's definite I reckon? Now," he demanded, "eying the crowd before him, "how about it? Who's quittin' and who's workin'?"

"I'm quittin'!" "Me too!" Two men stepped forward. "I've had enough of yore damned quarry, Fleming," one declared with unexpected spirit. "But mainly I don't expect yuh'll ever pay a cent. Once this dam's goin' yuh'll forget every man jack of us."

No hint of inner troubledness showed as he looked at the remaining crowd of workers who with Buster McLendon, and the man driving the injured pair to the Star Loop, comprised the staff. "Anybody else?"

For answer three shuffled away and picked up their tools. After some indecision and considerable growling, others followed suit. Nearly 24 men were again on the job.

Link took McLendon aside. "I sure appreciate you doin' yuh' best, Mac. And the fact that Helen and I owe you two months' pay and never heard a word about it since the day you came."

The other stired uneasily. I know you're a square shooter, Fleming," he paused. "Somebody around here spreads dissatisfaction among the men. They keep growling and complaining. This work is no harder than any other, but they keep worryin' that you won't find the money to pay them."

Link looked troubled. "How about Buster Townsend?"

"Townsend? What do you mean? He tries to make them work."

"Ever see him wearing leather cuffs with rivets formed like a fleur-de-lis?"

McLendon blinked. "Yes," he said slowly. "I think I have. I'm sure of it."

"Thanks, Mac. I'll have a talk with Buster." Turning away, Link found his ranch foreman squinting at blueprints. No one was within earshot.

"Where's that pair of cuffs you used to wear?" he inquired casually, glancing at the brawny arms with sleeves rolled up.

"Fuh? Oh, them! Darned if I know. Yes," Townsend added quickly. "I guess one of 'em's in the shack up above. I lost the other a couple days ago. Why?"

For answer his employer whipped out his forty-five. Its muzzle pressed hard against the foreman's stomach. "You held up Helen Hamilton yesterday, just outside Rawhide! He charged angrily. "Where's the money? Buster. I never thought you'd doublecross me!"

MILD · COOL · SMOOTH

Astonishment flooded the other's leathery countenance and he glanced down at the threatening sixgun. But there was no trace of fear showing, only hurt plainly evident.

"You're wrong, Link," he declared. "I pulled no holdup yesterday or any other time. I've worked for yuh faithful as any man could. Yes, and last Fall I got shot for yuh, too."

There was a moment of tense silence. "Mac?" called Fleming over his shoulder. The engineer approached, his eyes wide in wonder at the gun covering Townsend. "Was Buster working here yesterday morning, or was he gone for awhile?"

The man hesitated while he searched the faces of the pair standing tense before him. "Why, sure he was here! Buster and I were wrangling over some blueprints. In fact, he proved that I'd miscalculated five-eighths of an inch. You see, on those supports for the—"

"Himm. All right." Abruptly he holstered his gun. He waited for the pressure on his sober face. Then Fleming extended his hand. "I'm sorry, Buster. Refuse I'm tensed up about this thing. But how did your cuffs get on the holdup? Helen yanked one off, and I'm plumb sure it belonged to you!"

"Say! Ames Stephen came out here and gave me a regular third degree, but I didn't know what the heck it was about! Comprehension dawned in Buster's honest eyes; then a wan grin covered his face. "Link, I wouldn't do a job like that. I missed the cuffs and thought they must be somewhere around or in the bunkhouse on the spread. Now ain't that funny, huh?" And the foreman chuckled vigorously on his hind of tobacco.

CUTWORM SERIOUS ENEMY IN GARDEN

From the viewpoint of the gardener and the vegetable grower, cutworms are among the most important insects to be combated. They do an immense amount of damage annually, especially in the spring and early summer when the plants are young. The type of injury caused by these insects varies considerably with the species responsible for the damage. Most commonly, cutworms while feeding at the ground level cut through the stem of the plant, causing it to fall over and eventually die. Climbing cutworms ascend the plant and feed on the foliage, while other species attack the root system. Most cutworms are nocturnal in habit, hiding in the soil by day and emerging in the evening to feast upon their favorite kind of plant. Cutworms are widely distributed throughout the Dominion.

Under garden conditions, cutworms can be controlled by a poisoned bait which is broadcast over the soil either before the seeds are planted or prior to the setting out of the young plants. The bait is composed of the following ingredients—bran, 20 lb; molasses, 1 quart; paris green, $\frac{1}{2}$ lb; and water about 2½ gallons. In making the bait, says Alan G. Dugan, of the Field Crop and Garden Insects Division, Entomological Branch, Dominion Dept. of Agriculture, in charge of vegetable insect investigations at Ottawa, the dry ingredients should be

mixed thoroughly first of all. The molasses is then stirred into the water and this solution added to the bran and the paris green. In mixing the bait, add only enough water to make the material the consistency of wet sawdust. It must not be made sloppy but so that it will crumble in the hands and slip through the fingers easily.

In Eastern Canada, the bait should be spread evenly and thinly over the ground a few days before seeding or transplanting. It is important that this should be done in the evening and only following a warm day, since if the night is cold little feeding will take place and the bait will be wasted. If the plants are already in the garden, a teaspoonful of the bait around the base of each plant in the evening will give good results.

In the Prairie Provinces the bait should be spread after seeding but before any plants are up. In the case of transplanted seedlings the bait should be applied two or three days prior to the setting of the plants. Furthermore, the ground to be treated should first be watered but allowed to warm up again before the poisoned bran is broadcast.

In British Columbia the method of control is much the same as in Eastern Canada. However in this province the addition of three or four lemons to the bait is advocated. Both the juice and the rind are used, being added to the liquid part of the bait during its preparation.

Bait should never be left in a place accessible to children or livestock, as it is a deadly poison.

Rail Grading of Hogs—New Marketing System Proves Very Popular

During the past four weeks one Alberta hog raiser has bought over two thousand hogs on a rail graded, dressed weight basis. This method of buying hogs has just been inaugurated in Alberta during the past four weeks, and, from all reports, the farmers who have sold their hogs in this manner, are very well satisfied and are coming back again, to sell on the same basis.

The buying and selling of hogs on a dressed weight basis has been in operation in Eastern Canada for over a year. The packers buying on this basis report their shippers are very well pleased.

It is now well over ten years since the Federal Government installed the present system of live grading, and this could be called the first step in the right direction towards raising the right type of hogs. There has been a remarkable improvement during the last ten years, in the percentage of bacon hogs produced. This improvement, is a direct result of the present system of live grading.

The Federal Government are now sponsoring what could be called the second step, namely the marketing of hogs on a rail graded, dressed weight basis.

A few words of explanation; the marketing of hogs on a dressed weight, rail graded basis, is exactly what the words imply. A farmer delivers his hogs; these hogs are then tattooed with a number, so that they may be identified when they are killed. The live hogs are then weighed up, so that a part down payment may be made. This down payment usually runs around 75% of the butcher price. The hogs are then killed, and weighed individually, to the exact pound. A Government grading inspector then trades the hogs on the killing floor according to standards as set up by the Federal Government, and the final payment is made on the basis of that grade. These grades correspond very closely, to the present live grades, and the premiums and discounts paid are practically on the same basis. It will be easily seen that the Grading inspector is able to do more efficient grading with the split carcass before him, as he does not have to estimate weight, depth of backfat or thickness.

Whip marks, scratches and bruises shall not be a factor in determining the grade except those hogs that are seriously damaged. Carcasses that are condemned will be paid for on the same basis of the grade in which they would otherwise fall. The Government will issue releases on all Rail Graded hogs.

A farmer might well ask himself: Why should I change over to Rail Grading? How do I benefit by it? How does the hog industry benefit by it? These questions are easily answered. When the present system of live grading was instituted, the policy of paying premiums to the farmers who raised good hogs, was started. In a very short time there was a great improvement in the number of bacon hogs marketed.

To-day the following situation confronts us; A number of farmers have progressed to such an extent that it would nearly be impossible for them to raise a larger percentage of Bacon hogs. Another number are just raising an average percent of Bacons, while the balance of the farmers are just raising hogs. Under the present system of live grading the dressed "yields" of the hogs have a great deal to do with the final dressed cost. The word "yields" refers to the amount of dressed meat in relation to the live weight. For example; two farmers bring in two hogs, each weighing 200 pounds. When these hogs are killed, one weighs 150 pounds dressed while the other weighs 160-pounds dressed. Now it is easy to see that the 160-pound hog was a better yielding than the 150-pound hog, and that the producer of the 160-pound hog would receive more money; whereas, if these hogs had been sold alive, each producer would have received the same.

Now the purpose of marketing hogs on a rail graded basis is to give the producer of high quality and high yielding hogs the proper value of his hogs as related to the whole volume of hogs produced. In other words, the producer gets paid for exactly what he delivers.

The marketing of hogs on a Rail Graded basis not only gives the producer a premium on his bacon hogs, but also pays him on a basis of yield. Hogs that are fed right, and looked after properly, yield high, which results in the producer getting more money for his hogs.

Is this not sufficient incentive for the producer to raise good hogs, thereby benefitting the hog industry at large, and helping himself, at the

Viking News Items

The regular meeting of the Viking Women's Institute was held at Mrs. Kistor's home, with 32 ladies in attendance. Mrs. Rollans won first and second prizes with her knitting at the contest. Mrs. J. J. Brown and Mrs. Ross kindly consented to be judges. Mrs. Primett gave a most interesting description of the different kinds of schools in England to a very appreciative audience. Mrs. Cartwright, Mrs. Goodwin and Mrs. H. Hilliker were tea hostesses.

Monday, May 25th, was observed in town as a holiday. About thirty of our citizens took in the sports at Loughheed where the softball team won the tournament. Others took advantage of the warm weather and visited Viking beach. It was a very quiet day in town.

The gas company has a crew of 72 men at work laying a new one-half miles of 12½ inch pipe between Field and Ryley, which will greatly increase the amount of gas that can be delivered to Edmonton on short notice.

Wednesday half - holidays commence in Viking on June 3rd, at noon. Everybody concerned please take notice.

Olaf Olsenberg, local hog and cattle buyer announces every Wednesday as hog shipping day at Viking, and every Monday at Irma.

Citizens from town and country are reminded that cars should not be parked in the centre of Main street on Saturdays and holidays. This order has been made so that accidents may be prevented. Last Saturday evening there were hundreds of cars in town. When both sides of Main street are fully parked, the side streets should be used. Please observe these regulations, which are going to be enforced.

With seven softball teams competing in the Empire Day sports at Loughheed on Monday, the Viking Colts copied first prize, winning out in the finals against a team from the Wyoming district on the C.P.R. line. With Jack Kelly throwing the twists in the first game they took the Rosyth team into camp by the score of 8 to 5. For the finals Cecil Runyon took on the heating duties and in a nip and tuck battle, sent Wyoming home 10 to 9. The sports activities during the day included many other sports such as baseball, basketball and races.

A death of unusual sadness occurred on Thursday, May 21st, when Russell Pische, youngest child of Mr. and Mrs. Nicholas Pische, of Prague district, succumbed to the effects of peritonitis, at the early age of eight years. The little boy, who was a pupil of Prague school, had been to school on Monday as usual and did not complain of pain until his return home in the late afternoon. Even then he was not seriously indisposed and remained up until late in the evening. The malady became gravely aggravated on Tuesday and resulted in his death on Thursday in the early afternoon.

same time?

By the Ottawa Trade Agreements the Old Country gave Canada a quota of 280 million pounds of bacon, each year. Since this Agreement was put into effect, the closest we have ever come to reaching the quota was, roughly, 40 percent, or 168 million pounds short. We might explain, now:

The 40% we did ship was not of the best quality, due to the fact that the producers, had not raised the right type of hog. A lot of this bacon was just medium quality, and not the type that would command a premium, or establish Canada as a leading exporter, insofar as quality is concerned, on the Old Country Market.

Figure in dollars and cents, this 168 million pounds shortage represents, at an average price of 7¢ per pound, and an average yield of 55%, around \$16,000,000 worth of live hogs, each year. In number of live hogs, this would represent approximately one million head, each year.

What does all this mean? It just means this; we fell down to the extent of 16 million dollars a year, in using our natural resources. We did not raise enough hogs, and we did not raise hogs of good enough quality.

If all this shortage could have been consolidated and made up in our own Province of Alberta, (which would not have been impossible) Alberta would have been the most prosperous province in Canada to-day. Just imagine 16 million dollars a year more income into Alberta, and the results therefore! The marketing of hogs on a Rail Graded basis should be the means (just as it has been in other countries) of increasing the VOLUME and QUALITY of Canadian hogs to such an extent that Canada will be SECOND TO NONE.

Catholic Churches Reopened

Roman Catholics once more are being given the opportunity to practice the religion professed by more than 16,000,000 of Mexico's 18,000,000 inhabitants. President Cardenas has decided to permit the reopening of the many hundreds of churches closed by governors or other officials without a presidential order. The churches remain the property of the nation. Crowds of the faithful are shown flocking to the reopened cathedral in Mexico City for the first mass.

PRAIRIE PROVINCES FIVE-YEAR CENSUS, JUNE 1st, 1936

When the Government Enumerator Calls . . .

THE CANADIAN GOVERNMENT INVITES THE WILLING CO-OPERATION OF EVERY CITIZEN

COMMENCING June 1st, the usual five-year census of the three Prairie Provinces will be undertaken. The object of this census is to gather statistics by means of which your Government can function more intelligently, more effectively and more economically in the interests of all citizens of the country.

No Government ever yet succeeded or gave its best without a thorough knowledge of its country and its people. That is why we ask your utmost co-operation in the census of the Prairie Provinces which commences on June 1st this year. When the Government Enumerator calls at your door, receive him courteously. Give him all the information for which he asks. Remember, he is the agent of good administration and is in your service. Help him to complete his work with all possible despatch. On the accuracy and completeness of your replies to his questions depends the best interest of yourself and your Government.

ALL INFORMATION IS HELD STRICTLY CONFIDENTIAL
You can place absolute trust in the official enumerator who calls on you. All information you provide will be held in the strictest confidence. It is compulsory by law to answer the questions put by the enumerator. But you are living up to the spirit of good citizenship as well as to the letter of the law by giving information readily, completely and sincerely.

Issued by Authority of

The Honourable W. D. EULER, M.P.
Minister

DEPARTMENT OF TRADE AND COMMERCE

NEWS LETTER FROM EDMONTON

By T. B. Windross

Edmonton, Alta., May 26.—Everybody in the capital is waiting with interest for the government's announcement when Premier William Aberhart returns to his office Tuesday on the result of the cabinet conference at Ottawa. In a communication to the press the premier said no decisions had been reached, but he will doubtless have some indications to give the public as to the actual situation.

Should the prospect for federal co-operation in refunding and public works be unfavorable, it has been stated in government circles that the works program will be carried out by aid of a system of certificate in payment of wages and costs.

The scheme will be much the same plan that was used in Vermilion when Hon. W. A. Fallow was mayor of that town, the certificates redeeming themselves by means of a two per cent stamp tax affixed each time a transaction in which they are used takes place.

The above scheme is only a shadow of Social Credit, and it will not in any sense replace the promised basic dividends. That plan will be carried out, despite rumors circulated by opposition interests that it will not. In an interview given in Ottawa, Premier Aberhart is reported to have said, "We have been working steadily to prepare the groundwork so that we may start distribution of basic dividends."

It is being said that an organization of Communists throughout the province is being undertaken with the ultimate object of starting a march in Edmonton in an effort to make the government declare its plans regarding payment of basic dividends.

When acting premier Manning's attention was drawn to these rumors, he said, "I think this is merely new propaganda against this government and inspired without real basis for political ends."

Residents in the Lesser Slave district will be compelled to face the inconveniences of transportation facilities similar to last year until July 1 at least. The new road on higher ground above the flood area will not be completed before that date it has been announced. A ferry service will be in operation this week across the flood area, however. This is sure to delay motor traffic to the northern town.

Considerable demand is being made here for payment of the unpaid certificates by the government on a pro rata basis, instead of as at present to selected holders of the certificates. Mr. Manning pointed out, in reply to a presentation of the case, that the policy of the government is to pay for certificates held by people where there is special need for the money.

If the payments were made on a pro rata basis, he explained, big holders such as bond houses and corporations holding bonds and certificates would get large sums on a percentage basis, while the poor, small holder would receive an infinitesimal sum for their certificates. The fairer way is to follow the course now being followed by the treasury department and pay only where there is real hardship and need.

Rev. H. A. Sovereign, Bishop of Athabasca, is reported from Ottawa as saying many families from the cities in Alberta are trekking into the Peace River country and settling on farms "rather than line up before soup kitchens." He said there is a total of 75,000 settlers now in the district.

On June 5, it is now definitely settled, His Eminence Cardinal Rodrigue Villeneuve, Archbishop of Quebec, will arrive in Edmonton on his first visit to Western Canada as a cardinal. It will be the first time any cardinal has visited Edmonton. He will be greeted at the station by civic, government and church officials, and he will spend four days in the capital.

Another national figure will be in Edmonton on August 18th, in the person of His Excellency the Governor-General of Canada, Lord Tweedsmuir, who will be accompanied by Lady Tweedsmuir and a party of his Ottawa staff. This will be the first visit of His Excellency to the west since assuming office. They will stay at Government House with Lieutenant-Governor Walsh and Mrs. Walsh for one night. They are on the way to Jasper Park and the Pacific coast and are expected to stay longer on the return trip.

It was announced at the office of Hon. E. C. Manning, that the full

Market Prices.

By Dominion Livestock Branch

Edmonton Stockyards, May 26. — Receipts today were: Cattle 104, hogs 64, calves 14, sheep none.

A good demand was in evidence on the cattle market this morning, but there were sufficient receipts to really establish a market. Buyers quoting fully steady prices.

Following are today's prices:—

Cattle—
Good choice fed calves 4.00 to 4.50
Good choice steers 3.75 to 4.50
Medium steers 3.00 to 3.50

Veal Calves—
Good choice 5.00 to 5.50
Common to medium 2.50 to 3.50

Sheep—
Good to choice lambs 3.50 to 3.75
Others 7.50 down
Yearlings 4.50 down
Ewes 3.50 down
Hogs firm, up to noon trucked-in bacon sold at 7.60.
Sheep receipts, nil. Good lambs quoted at 8.50.

Thirty Pounds of Butter Per Head

According to a provisional estimate, the people of Canada consumed 3,991 pounds of butter and 3.61 pounds of cheese per head of population in 1935 when 338,396,970 pounds of butter and 39,572,341 pounds of cheese were disposed of. In 1934 the consumption of butter was 336,824,894 pounds, or a per capita consumption of 31.12 lb. Between 1933 and 1934 there was an increase amounting to almost a pound per head, but the 1935 figure is just about three-quarters of a pound above the 1933 figure, and less than one-half pound above the 1932 estimate. In other words, the average run of consumption of butter is over 30 pounds per head of population.

The consumption of cheese in Canada in 1935 is estimated at 39,572,341 pounds, or 3.61 pounds per head of population. This is practically the same per capita figure as in 1934, but compared with 1933 shows the small increase of 0.22 pound, and an increase of 0.36 pound compared with 1932.

Mr. R. Pyle has opened a watch and clock repair shop in the old meat market building. All work neatly done and guaranteed for one year. Advt.

The annual lawn social of the Sharon Lutheran Ladies' Aid will be held at the home of Mr. and Mrs. E. R. Erickson, 1 mile south of Coal Springs school, on June 17th. Chicken supper served from 5 o'clock and on. Everybody welcome. Advt.

provincial sales tax must be paid on the purchase price of tailored clothing and on other articles made to order, but no tax is charged on dental or shoe repair work. Dentists are rendering professional services and are not required to collect the two per cent tax from clients paying for such services, it was explained.

For the first time since April 1st, there has been a rush of eastern buying orders for Alberta bonds, according to Edmonton brokers. The spurt is said to be due to reports that the Alberta delegation headed by Premier Aberhart will finally reach an agreement with the dominion government over refunding and other questions of a financial character.

A new, secret process for coal has been presented to the provincial government as a possibility for making Alberta fuel coals the equal to any on the market, no matter how far it has to be shipped. It is possible that a \$500,000 plant for processing coal may be established at some point to handle the work. Should the plan suggested by representatives of the Montreal firm of engineers, the Grant Engineering Company Limited, be undertaken, it would likely mean that Alberta will supply many thousands of tons of coal now being supplied to Eastern and middle Canada and western United States. It is estimated that \$70,000,000 yearly imports will be turned into exports if the plan succeeds by those sponsoring it.

No action of the government can be taken until Premier Aberhart and other cabinet ministers return from their trip east after the Victoria Day holiday.

CIGARETTE PAPERS

The League and World Security

Have the League of Nations proved a failure? Have the efforts of millions of people to put into effect the principle of collective security for the nations of the earth been abortive? Should the League, in the light of recent events, be abandoned and allowed to die? In fact, is the League already gagged, helpless and practically defunct?

These are questions which are agitating the minds of peace-loving people in all the countries of the world to-day. Many who saw the birth of the League a few years ago as an insurance policy against future conflagrations between the nations are now shaking their heads sorrowfully and are on the verge of abandoning hope. They are fearful that the nations are to revert to former practices and policies of "dog eat dog and the devil take the hindmost."

It is pointed out by these pessimists that to date the League has two apparent failures to its credit, or should it be said, to its discredit? They refer to the inactivity of the League when Japan two or three years ago was allowed to launch unhindered an aggressive campaign to bring Chinese territory under control—a process which is still being carried on, and more recently the failure of the League's attempt to stem the victorious march of Mussolini's troops into Ethiopia, by the application of economic sanctions.

It is true that Mussolini appears to have achieved his immediate objective, live and not only conquered Ethiopia, but has also annexed the country as an adjunct to the Italian crown, despite the efforts of those countries which remained in the League to prevent Italy from gathering the fruits of her lawless enterprise.

The fact, however, should not be overlooked that while Italy has so far succeeded in her ambitious program of conquest in Africa, the nations have not yet withdrawn sanctions against her and that by the continued application of this form of pressure it is still possible to force the victor to disgorge, if not all, at least a portion of the spoils of an illegal war.

In other words the foulest members of the League still have it within their power to demonstrate to Mussolini that international lawlessness does not pay. All that is needed, as pointed out recently by the Winnipeg Tribune is decisiveness. "The members of the League," said the Tribune, "can, by showing a little courage and determination at this juncture make it more of a living and vital force than it has ever been," but this newspaper adds, "unless they show some courage and determination in the present circumstances the League of Nations and collective security will vanish like the shadows of yesterday."

The Tribune further points out that Mussolini after all has only won the first race and "is still racing against time in the application of the economic sanctions which are slowly but surely strangling Italy into submission. He cannot win that race unless the League members weaken and allow him to escape from the inexorable pressure."

There are very cogent reasons why wavering faith in the League should be restored. One of them is the urgent desire of the great masses of the people in the majority of the countries of the world for peace and security, so essential if economic recovery and progress is to be made. All that is necessary is for these people to strengthen the hands of their representatives by impressing upon them this viewpoint.

Another and very potent reason is the necessity for continuance and strengthening of the League and its powers if civilization is to be preserved. There is no blinking the fact that the majority of the European nations are arming to the teeth and that in some cases at least, conquest and subjugation are unrevealed motives. If that is true, a strong League is the only hope of security from further aggressions which may well involve the entire world.

Warnings of this very grave danger have recently been uttered by some of the outstanding statesmen of several countries and they are warnings that should not go unheeded.

That such a war is not only possible but "inevitable" is the opinion of General Ludendorff of Germany who makes this very clear in his new book whose very title is significant, "The Total War". According to a commentator on this book in Les Annales de Paris, Ludendorff only admits a war which engages the existence of the entire nation—men, women and children; in other words, a war conducted without mercy, "its only aim being the total annihilation of the enemy."

Apparently a strengthened and revitalized League is the only hope of security the nations can expect against such "a war of frightfulness."

The greatest of the fancy skaters will tell you that, contrary to popular belief, one doesn't need strong ankles to succeed at that sport.

Germany bought nearly two-thirds of the cotton produced in Brazil in the last year.

Industrial production in Austria is at the highest point since the world war.

After all, you bake for nourishment! Purity Flour—rich in gluten—has more "life" and nutrition. It also imparts that fine, tasty flavor which will make all your baking delightful.

PURITY FLOUR
Best for all your Baking

Demonstrates Plastic Surgery

Doctor Fashions New Ear From Portion Of Rib

Taking part of a human rib to build a new and shapely ear by plastic surgery was demonstrated to the American Medical Association at Kansas City by Earl C. Faggett, M.D.

The piece of rib, taken from the cartilage at the base of a rib, forms the shell-shaped framework for the synthetic ear. The skin to cover this cartilage, and to form the soft fleshy "tire" constituting the ear's outer border, is taken from the neck.

Afterward the skin thus lost to the neck is replaced by skin taken from the thigh so that no neck scar is apparent.

The skin from the neck upon which depends the final slightness of the new ear is moved by detaching it first to the temple by the plastic method known as the pedicle flap, which resembled the handle of a suitcase. After this flap has been attached by one end to the temple area so that it gets its blood supply from that point by contact, it is ready to be dropped down over the new ear structure and be moulded into place.

WAKE UP YOUR
LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of fluid bile into your bowels daily. If this bile is not flowing freely, your food does not digest, it just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sick and the world looks grim.

A mere bowel movement doesn't always get rid of the cause. You need something that works on the liver as well. It takes these good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of a laxative but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Satisfactorily reduce anything else. See.

Destroys Bacteria

New Device That Will Be Of Assistance In Operations

Invention of a new type of cool germ-killing rays that destroys air-borne bacteria about the patient on an operating table was announced to the American Association of Thoracic Surgery by Deryl Hart, M.D., of Duke University Medical School.

The rays come from long, slender tubes framing the light above the operating table. Their rays are selected wavelengths of ultra-violet—which kill air-borne germs in 60 seconds, but do not burn human beings.

The tubes were designed by Dr. Robert F. James and Dr. Harvey Rentschler of the Westinghouse Lamp Company.

MOTHERS, DAUGHTERS

NO need for women or girls to suffer every month from periodic twinges, aches or headaches. In girlhood Dr. Pierce's Favorite Prescription is a very beneficial tonic. This is what Mrs. Wm. Rowell of 20 Manchester St., Guilford, Ont., said: "My complexion had been pale, muddy, sallow and yellow and I felt tired out day after day. I had frequent headaches and would feel so miserable. I used Dr. Pierce's Favorite Prescription Tablets and they helped me in every way. My complexion cleared up and the headaches disappeared. Buy one of your nearby druggists. New size, tablets 50c, liquid \$1.00 & \$1.50. Write to Dr. Pierce's Clinic, Buffalo, N. Y."

Use Of Codeine

Canada Has Highest Consumption Of This Drug In The World, Says Federal Member

Canada has the highest codeine consumption in the world, D. J. Hartigan (Lib. Cape Breton South) told the House of Commons. It could be purchased in capsule form at drug stores in quantities big enough to form a life habit.

Codeine should not be purchasable in Canada without prescriptions, Mr. Hartigan suggested. It should be controlled and imports stopped.

Must Discard Old Clocks

Los Angeles has ordered 200,000 sixty-cycle clocks to replace the present 50-cycle time keepers that will be outmoded as soon as the Boulder Dam electric system gets into operation. Otherwise the old clocks with the new 60-cycle impulse would make the citizens speed up 20 per cent. faster than previously.

He Was Starved

An unidentified man came into a Tampa, Florida, restaurant and announced he was hungry. He proved it by eating 17 steaks and 34 rolls and drinking 14 bottles of beer in two hours and a half.

Those who suffer from acid should avoid three fruits—cherries, cranberries and plums.

Have Seen Great Changes

Two Halifax Ladies Remember Days Of Sailing Vessels

Two elderly Halifax women—their ages total 197 years—look forward with interest to the maiden voyage of the super-liner Queen Mary.

Both of them are something in the nature of ancient mariners. Mrs. Fanny Lenoir is the only person living who set foot on the little steamer Britannia when it sailed into Halifax harbor on its first voyage in 1840.

The other elderly seafarer, Mrs. Loring W. Bailey, crossed the Atlantic ocean from Liverpool to Halifax in the Cambria, a side-wheeler with sails 87 years ago. Both were six years old when they stood on the decks of their vessels.

Passage of years has not dimmed the memories of her first ocean crossing for Mrs. Bailey. Her father came to Canada to become chief superintendent of education in New Brunswick, she recalled.

Cheery and still active in spite of her 103 years, Mrs. Lenoir remembered the arrival of the little Britannia vividly. She folded her arms and recalled the excitement of old Halifax in 1840.

"Word got around the Britannia was coming up the harbor," she related. "It was only a child but my mother gave my sister Lucy and me permission to go down to meet it. We lived not far from the wharf."

She told how a "gentleman in a tall silk hat," came down from the boat and took her sister and herself aboard. "My it was exciting," the old lady exclaimed.

Mrs. Lenoir has seen the ocean steamers change from wood to steel and expressed keen interest in the new liner Queen Mary. "It would be wonderful to see it," she said.

Will Appeal To Travellers

Air-Conditioning Of Trains Will Mean Greater Comfort

One of the irritations of railroad travel was the dust and smoke that filled nostrils and eyes and smudged faces and clothes. Railway officials talked much but did little about remedying the condition. It is gratifying to note that they have now set out in earnest to cure the defect. It is announced that on all main lines of the C.N.R. the coaches are to be air-conditioned. Most U.S. lines have already installed this equipment.

The public will be as ready to praise the development as it was to criticize previous indifference. Air-conditioning will not only bring pure air free from cinders and smoke, but will keep interior temperatures cool in summer and warm in winter.

It is by devising and installing comforts of this nature that the railways may hope to win back the good-will and patronage which has been lost. There are many obvious advantages to train travel and these can be capitalized if made sufficiently attractive.—Toronto Telegram.

Honored After Many Years

Body Of Leper Apostle Now Rests In Belgium

Father Damien, Belgium's famous "leper apostle," who spent most of his life on the leper island of Molokai, Hawaiian Islands, was buried in a crypt at Louvain, Belgium, after lying in state at the Holy Heart chapel. Thousands filed past his coffin and prayed. A monument is being erected to his memory. The body of the priest was taken to Belgium for belated recognition of his work. He died in his voluntary exile among the lepers of Kalawao, February 15, 1889, and the body was exhumed for the trip back to his homeland.

Halstead street, in Chicago, containing representatives of practically every race in the world, is more than seven miles long.

SELECTED RECIPES

BROWN BREAD

- 1 cup wholewheat flour
- 2 cups wheat flour
- 1 teaspoon baking powder.
- ¼ cup Edwardsburg "Crown Brand" Corn Syrup
- 2 cups sour milk
- 1 cup flaked bran
- 1½ teaspoons soda
- 2 teaspoons salt
- 1 tablespoon Mazola

Mix dry ingredients; add syrup, Mazola and sour milk. Beat well.

Pour into oiled bread pan and let stand 1 hour. Bake in moderate oven at 350 degrees F. for 1-1½ hours. Recipe makes 1 large loaf.

Sir James Barrie

Author Of Peter Pan Celebrates His 76th Birthday

Sir James M. Barrie spent his 76th birthday quietly on May 10th in the famous flat where the immortal Peter Pan was born.

Callers who were not allowed to see him were assured by his Scottish housekeeper that the famous author was "Verra weel, thank ye kindly."

Sprigs of heather brought greetings to the "author who will never grow old" from his native Kilmuir, while other friends remembered him with flowers and telegrams.

IN IRMA EVERY TUESDAY
Electrical Equipment
Foxwell Block

Mr. Bruce Hadlow is employed as timekeeper at present on a C.N.R. extra gang.

A considerable amount of gravel is being distributed along the main line of the C.N.R. this summer.

Mrs. F. N. W. Watkinson held a successful auction sale of household goods on Saturday, May 23rd.

Dr. and Mrs. Greenberg spent last week-end in Edmonton attending the wedding of Mrs. Greenberg's sister.

Mrs. T. Levoir and son Cecil moved to Tofield last Saturday, where Mr. Levoir is working on the C.N.R.

Mrs. Carl Larson is in Edmonton taking some after treatments for her operation she underwent a few months ago.

Rev. and Mrs. E. F. Kemp and family visited Mrs. Kemp's parents on their farm near Vegreville on Monday and Tuesday.

The 12 years and under boys' ball team took part in the contests at Vermilion on the 25th, losing out in a good game with Innisfree.

Mr. E. P. Beacock was operated on for appendicitis in the Wainwright hospital on Thursday, May 21. Last reports are that his condition is improving.

Mrs. C. T. Hill and daughter, Mrs. P. J. Hardy, of Edmonton, are leaving on Saturday for a six weeks' trip to Boston, Mass., to visit relatives and friends.

E. E. Maxwell, of Edmonton, representing the Lands Dept. of the Great West Life Insurance Co., drove through Irma the past week, greeting old friends on the way.

The Irma girls softball team motored to Loughheed on the 25th to take part in the games. The first game was played with Hardisty and resulted in a win for Irma but they lost to Rozyth in their second game.

Mr. and Mrs. Kenneth Sparrow and daughter, Ada Louise, of Saskatoon, arrived on Sunday last for a visit with Mrs. Sparrow's parents, Mr. and Mrs. S. G. Simmons. Mr. Sparrow returned Monday evening, while Mrs. Sparrow and daughter will visit in Irma for some time.

While attending high school last Wednesday, Rosie Sharkey suffered a fainting spell. Mr. Locke brought his car and took her home, where Dr. Greenberg revived her and then took her to Wainwright hospital where she has steadily improved under the efficient care of the doctor and nurses.

Mr. L. J. Gwinn had a serious accident this week. While he was driving a disc his team ran away, throwing him under the implement where he was badly injured. Broken ribs, shock and much general soreness are among the results. His son, Louis, from Wilkie, Sask., has arrived and is carrying on the farm work.

A truck turned over on the highway a couple of miles west of Irma last Wednesday morning. The truck which was going west is supposed to have hit loose gravel and became unmanageable. The occupants escaped injury although the radiator and cab were damaged considerably. Simmons & Son are completing their travelling contract with the Village of Irma.

Wedding Bells

KELM — SHARP

The marriage of Miss Catherine May Sharp, daughter of Mr. and Mrs. Carl F. Sharp of Hilland avenue, and Herbert Kelm of Vance avenue, son of Mrs. G. A. Sisson of Huntington, W. Va., will take place this evening (Fri., May 15) at 7:30 o'clock at the home of the bride's parents. The Rev. W. Bruce Wilson, pastor of the United Presbyterian church will officiate. Miss Dorothy Sharp will be her sister's maid of honor, and Miss Elsie May Kline and Miss Gertrude Kline, bridesmaids. Alex Nagy will be Mr. Kelm's best man. Mrs. Charles Simonsen will play the wedding music. Out of town guests who will be present are Mr. and Mrs. E. L. Stoneking, Miss Ann Henderson and Miss Marie Stevens of Sistersville, W. Va., Mrs. Nina Piek of Oil City, Mrs. G. A. Sisson of Huntington, W. Va., and Mr. and Mrs. Keller and granddaughter, Vera Keller, of McKees Rocks. Following the ceremony a reception will be held in the Sharp home, after which the couple will leave for a wedding trip. Upon their return they will reside on Vance avenue. —Contributed.
